

## Technical Details

Operating conditions	
Maximum speed	15 m/sec
Temperature range	-60°C + 150°C

## DESIGN

GF2 guide rings are to guide pistons, prevent metallic contact of the machine parts and absorb the transverse force that occurs.

GF2 guide rings also minimises the stick-slip effect and are suitable for low friction.

## FEATURES

- Flexible for easy installation
- Long life
- No stick-slip
- Reduce vibrations, good damping effect
- High chemical compatibility

## MATERIAL

Seal design comes in a variety of materials and sizes. For more information, please refer to MSDS datasheet.

## APPLICATIONS

Light to medium duty applications
