

Technical Details

Operating conditions	
Shaft surface speed	10.2 m/sec
Temperature range	-29°C + 121°C
Maximum pressure	0 to 0.48 Bar

DESIGN

BP11 is a spring loaded dual lip seal. The seal design features a nonmetallic composite for an easy and damage free installation.

The dual-spring loaded lips are used when the separation of two fluids is required. BP11 is also used for high contamination applications in keeping out dirt, fluids and other contaminants.

FEATURES

- Easy and damage free installation
- Long life
- Comes in a wide range of sizes
- Excludes dirt, fluids and other dirty contaminants

MATERIAL

Seal design comes in a variety of materials and sizes. For more information, please refer to MSDS data-sheet.

APPLICATIONS

For oil retention or grease retention.

General applications:

Electric motors, gearboxes, pumps, fans, runout tables, paper rolls, mixers, work rolls and custom equipments.
