

### Technical Details

Operating conditions	
Shaft surface speed	16.25 m/sec
Temperature range	-29°C + 121°C
Maximum pressure	0 to 0.48 Bar

### DESIGN

BP12 has been developed to protect joints, bearings, bronze bushes, flanges and all the mechanical parts in the rotation or semi-rotation.

It is made of Polyurethane, and has a low permanent defoamation preventing penetration of impurities.

### FEATURES

- Flexible for easy installation
- Long life
- Repels dirt, fluids and contaminants

### MATERIAL

Seal design comes in a variety of materials and sizes. For more information, please refer to MSDS datasheet.

### APPLICATIONS

Light duty applications
